# REFINOIL

## YOU, ONE OF OUR FARMERS

Make by Saving, as well as by earning. Your women folk save with eggs, butter and other articles, and you can save from 30c up, on a gallon of OIL, so long as that OIL is equal to any of the best. U. S. Government tests prove it better than most oils.

REFINOIL is the "CREAM OF ALL OILS," and there are "None Better at Any Price." We can prove that fact and any REFINOIL user will so tell you. 98% of those who try REFINOIL are permanent users and boosters. The largest Railroads, Airlines, Bus and Street Railway Companies, and thousands of others are REFINOIL USERS together with the U. S. NAVY and 18 RAILROAD COMPANIES.

## AND HERE'S WHY IT IS BETTER

REMEMBER, OIL DOES NOT WEAR OUT. In fact, it has greater stability after it has been used in an internal combustion engine such as the engine in your car, truck or tractor, and then refined, than when originally purchased. This is due to the fact that the engine supplements the process of refining; that is something more than is accomplished in the refinery by breaking unstable constituents contained in the original oil. We have REFINOIL in all weights, S. A. E. 10 to 50. We are REFINOIL MERCHANTS.

## THE FINEST MOTOR OIL YOU CAN PUT INTO YOUR CAR, TRUCK, OR TRACTOR

ONLY 12c a QUART — 5 Gal., \$2.00 — 30 gallons or more, 35c a gal. Bring your container, or we can furnish 5-gal. galvanized cans at 50c each, 2-gal. cans at 30c each. At these prices we cannot make deliveries. We give excellent service. YOU SAVE 30c A GALLON.

### GUARANTEE

We guarantee REFINOIL in every respect and if you are not satisfied after using it, we will refund your money. We claim it is as good as or better than any 30c or 35c oil on the market.

**ANNOUNCEMENT**

We are herewith presenting our second edition of a Buchanan County, Missouri, Farm Directory.

It contains information of considerable interest and value to the farmers and business people of the county and is a reference book to use frequently.

We desire to express our appreciation for the cooperation of the Buchanan County Farm Bureau in supplying material of an informative and instructive nature to farmers of the county.

We also appreciate the co-operation and support of the advertisers, all of whom are wide-awake, up-to-date business firms who realize the potential value of this medium of advertising.

We wish to state that if any advertiser is not entirely satisfied with the appearance of his advertisement, he needs only write to us and his complaint will be given prompt attention.

**PUBLISHER'S NOTE**

The information in this directory was gathered from reliable sources and compiled in a way to insure maximum accuracy. However, the publishers cannot and do not guarantee the correctness of all information furnished them, nor the complete absence of errors and omissions, hence, no responsibility can be or is assumed.

CENTRAL STATES PUBLISHING COMPANY

Des Moines, Iowa

## Buchanan County Agricultural Information

The area of Buchanan County is 408 square miles. There is approximately 243,000 acres of farm land in Buchanan County, approximately 158,000 acres of crop land. 65% of the farm land is hill and the other 35% bottom land.

Buchanan County ranks second in the state in tobacco acreage, there being approximately 1000 acres in tobacco.

From 40,000 to 45,000 acres of corn is grown annually, and wheat annually varies from 40,000 to 60,000 acres. Besides grain farming in the territory adjacent to

St. Joseph there are many small fruit, truck and dairy farmers.

The Missouri and Platte River bottom land is mostly in corn, wheat and some alfalfa.

There is considerable river bluff land immediately south of St. Joseph in orchard and other fruits. The Southwestern part of the country is devoted largely to wheat and tobacco, while the Eastern part of the county is given to general farming, including livestock and in this part, most of the feed is utilized on the place.

### BUCHANAN COUNTY EXTENSION OFFICE

The Buchanan County Extension Office is located on the 3rd floor of the Postoffice Building in St. Joseph, Mo.

The Extension Office is financed by the Federal, State and County Government, and is sponsored by the Buchanan County Farm Bureau. There has been an Extension Office in Buchanan County continuously since 1915.

The aim of the Extension Service is to increase farm income, and improve farm families' opportunities educationally and socially.

During the past seven years the Extension Office has had the responsibility of carrying on the educational phase of the Wheat, Corn-Hog, Tobacco, and Soil Conservation programs. The administrative part of the various programs has been carried on through local committee-

men, and the proceeds from these various programs has exceeded \$1,000,000.00 in benefit payments to farmers, and it is impossible to estimate what the value of these various programs has been. It has increased the price levels of commodities, and has provided an incentive for farmers to adopt better farming practices.

It has also been the responsibility of the Extension Office to handle Drought Rate Certificates and work with the Government on Drought Cattle Buying, Tuberculosis and Bangs' Disease testing, Drought Loans, Freight Rate Reductions, Supply of Drought Seed, and other similar services not strictly the educational phase of Extension work.

Goals of the Extension Service Office are as follows:

Better varieties and strains of crops — whether they be used for livestock feed or food for human consumption;

Proper rotation of crops and handling of farms in such a way as to control erosion and maintain soil fertility;

A better grade of livestock — particularly purebred sires, the feeding of livestock and handling of stock in such a way as to eliminate parasites;

Establishment of rural electrification in Buchanan County, so that every farm home that so desires, may have service for electricity.

Better schools and community meeting places so that

farmers and their families may have recreational facilities in their own communities;

More attractive homes and more conveniences for the housewives;

A better balanced diet for the family during the 12 months of the year, not only raising a large portion of the food to be consumed on the place, but also properly processing the food so that it will be healthful and nutritious.

Better roads, churches, and any other movement that will increase farm income and make the rural section of Buchanan County a better place in which to live.

The Extension Office is maintained to be of service to the farm people of Buchanan County. Information that is supplied through this office is obtained through the United States Department of Agriculture and through the State College of Agriculture and Experiment Stations throughout the Nation. Every resident of Buchanan County should feel that this is their office, and they are welcome at any time to come in and report any problems or difficulties which may confront them. The number of farmers in Buchanan County is so great that they cannot all be reached. If the Extension Office can be of assistance to you, do not fail to pay it a visit.

Eula M. Neal, Home Demonstration Agent  
Roscoe V. Hill, County Extension Agent  
Gerald Sigars, Ass't Co. Extension Agent

**HOG FEEDING**

The use of the protein supplement in connection with grain feeding, especially with hogs, is a well established practice, and since the most economical gain, as well as the fastest gain, can be secured by grain feeding with a proper high protein supplement, the schedules in the next column are suggested for hog feeding.

Self-feeding as compared to hand feeding has been tried by most experimental stations as well as farmers and each has its advantage. Generally speaking, however, a little more economy can be secured by hand-feeding than by self-feeding. The advantage of self-feeding is that the hogs always have an abundance of feed and less labor required. A general rule in hand-feeding is to feed about 1 gallon of tankage or meat meal to 1 bushel of corn, or the tankage can be fed in one compartment and the grain in a separate compartment. A mineral mixture of equal parts of finely ground limestone, bone meal and salt makes an excellent mineral mixture. It can be kept at all times.

**CATTLE FEEDING**

When corn and alfalfa are furnished to cattle on full feed, little additional protein supplement is necessary; however, if other than a good legume hay is used, the cattle should receive at least 1 pound of cotton seed cake or its equivalent per head per day.

**INSECT CONTROL**

Insect control divides itself into two divisions as follows: Insect enemies of the growing crop and insect enemies of the stored grain.

The following formulas are used for grasshoppers, army worms and cut worms. All of the following formulas are satisfactory and are used according to the material available for mixing the bait.

**I.**

Bran .....	100 pounds
Paris green or white arsenic .....	4 pounds
Cheap molasses (Black strap) .....	8 quarts
Water .....	7 or 8 gallons

**II.**

Bran .....	100 pounds
Sodium arsenite (Liquid 40%) ....	2 quarts
Water .....	9 or 10 gallons
(Sawdust may be used to replace half of the bran in either formula, I. or II.)	

**III.**

Sawdust equivalent to 100 pounds of Bran	
Red-dog or whole wheat flour ....	15 pounds

Sodium arsenite (liquid) .....	2 quarts
Water .....	about 7 or 8 gallons

With grasshoppers the bait should be scattered evenly at the rate about 10 pounds per acre as early in the morning as possible. Usually about 2 or 3 applications are necessary for heavy infestation at intervals of about 4 days apart. When the above mentioned bait is used for cut worms or army worms, the bait should be spread in the evening just before sundown.

The chinch bug infestation is a common insect trouble in Buchanan County. The first step in any chinch bug control is to clean up all rubbish, fence rows and other harboring places where the chinch bugs can live over during the fall and winter, burring where possible. In case the chinch bug appears in the small grain, such as wheat, oats, or barley, the grain should be removed as early as possible and the chinch bug barriers established between the small grain field and corn or other grain field. This can be done by plowing a furrow. Loose dirt thrown out should be thoroughly packed and an oil line established on top of the furrow slice just next to the furrow. Forty-five gallons of oil properly used will make a barrier  $\frac{1}{4}$  mile long. This line should be renewed daily during the period of heavy bug infestation. It is also well to dig post holes in the furrow immediately adjacent to the oil line at intervals of fifteen to twenty feet. Oil or potassium cyanide may be used in these holes daily to kill the bugs.

# ALKASOTE FOR HOGS

I RECOMMEND THIS MEDICINE FOR HOGS as a general Conditioner, and I have found it especially helpful to Hogs having Necrotic enteritis.

This is a tonic I have used in my twenty-five years experience as a Hog Breeder. If dissatisfied with results, your money refunded.

**FRED FARRIS**  
FAUCETT, MO.
